

Video Course Format

EHF endeavours to promote education about Headache Management and to facilitate the educational exchange amongst medical professionals.

In order to breach the gap in education in developing countries, a new type of Headache School is offered. Video recorded sessions of the Mallorca School, held in March 2009, are available for educational and training purposes.

A representative from a local hosting institution can act as facilitator to mediate between video lectures and discussion forums. For those who wish to host a video conference course, please contact the EHF Administrative office at info@ehf-org.org

Participants

Medical doctors and specialists (neurologists, clinical pharmacologists, etc.) with an interest in headache wishing to improve their skills in the diagnosis, treatment and management of headache.
